

Mevas - The Heavy Equipment Inspectors - Your Benefits

Securing Your Machinery Purchases with Mevas Pre-Inspection Services

Mevas specializes in inspecting used construction machines and earthmovers like excavators, wheel loaders, bulldozers, motor graders and other construction and earthmoving machinery. With extensive experience across various brands, we guarantee thorough assessments to protect your investment.

💰 Don't risk your money on a faulty machine! Our inspections cost less than potential losses from hidden problems. We provide detailed reports and advise on necessary repairs.

🔧 Each machine, crane, or truck undergoes a comprehensive inspection using specific checklists. Our inspectors verify all specifications, assess engine, hydraulic system and transmission conditions and check for cracks, damages, missing parts and abnormal noise.

✓ Secure your purchase today with Mevas Pre-Inspection Services and buy with confidence!

Our Mission and Values

We are a reputable German company with an extensive network of machine inspectors specializing in the meticulous inspection of used equipment, a task we undertake on a daily basis. With inspectors stationed in many European countries, we ensure comprehensive coverage, granting access to most countries on the continent. Additionally, our reach extends beyond Europe, with engineers available in the Middle East, various states of the USA, Africa, Australia, and Shanghai, enabling us to serve clients worldwide.

The question arises: Can you trust Mevas? The answer is a resounding yes. To maintain absolute integrity, Mevas remains completely independent, refraining from trading machines or accepting commissions from traders or buyers. We handle all information about machinery conditions with confidentiality and inspection reports are never shared with third parties.

Services

Our team consists of experienced engineers who are trained to inspect a wide range of used machinery. We inspect various machines and equipment such as:

1. Construction Equipment (Excavators, Wheel loaders, Bulldozers, Motor graders)
2. Mobile Cranes & Fork Lift Trucks (Mobile cranes, Harbor cranes, Reach stackers, Fork lifts)
3. Road trucks and Concrete Pumps (Road trucks, ready-mix trucks and concrete pumps)
4. Recycling and Mining Machinery (Crushers, Haulers, Screen plants)
5. Engineering Equipment (Drilling Rigs, Pile drivers)

Buy used machinery with reduced risk. Get an inspection report for less than the cost of a hydraulic cylinder repair. Contact us for a non-binding offer and a possible inspection date.
